HP² HUMAN POTENTIAL HORSE-POWERED

For Leaders, Teams, Individuals... **HorsePlay HP²** **deepens awareness** and **builds essential skills** to **achieve exceptional results** through **quality relationships**. If you seek unique and sustainable learning, the horses await!

Why Horses?

- **Unique Partnership.** For hundreds of generations Horses have carried us on their backs, taking us farther and faster than we could travel alone. Today, in unique partnership with humans, Horses guide us to **rediscover our natural, innate gifts** to design innovative strategies **for sustainable, extraordinary existence**.
- **Connection.** Horses are social animals, instinctively bonding and herding. As creatures who have thrived for 55 million years, they are **exceptional teachers of optimal communication, leadership, team work, group dynamics, adaptability** --all in pursuit of survival, success and well-being.
- **Level Playing Field – Expanded Comfort Zone.** Few people know intuitively how to work effectively with a horse. This “zero-baseline” offers a level playing field in which **all participants are equal in the work**. This zero-baseline is outside our natural comfort zone, providing a **fertile ground for learning** to occur.
- **Choice.** Learning activities provide inspiring metaphors for dealing with challenges, enabling us to **explore and move beyond limitations** into expanded opportunities for choice.
- **Feedback without Judgment.** As prey animals Horses are highly-attuned to non-verbal cues. They **mirror** what humans think and feel in the moment, providing **“real time” honest feedback without judgment**. They teach us to focus on intention, energy, behavior and communication.
- **Leadership.** Leading a horse offers multiple, rich analogies for leading others. Horses are born leaders who trust their **senses**, know their **purpose** and take **clear action**. To lead a horse requires **vision, alignment and renewal** --three essentials for successful leadership.
